PROFESSIONAL SUMMARY

AI Engineer with production experience building agentic pipelines, LLM evaluation infrastructure, and RAG applications. Skilled in end-to-end AI development — prompt engineering, multi-model orchestration (GPT-4, Gemini, Claude), automated benchmarking, and ML classification. Focused on building reliable, scalable AI systems that deliver measurable impact.

EXPERIENCE

Data Analyst (AI Automation) | Highspring India LLP · Google xWF Jan 2025 – Present · Gurugram, HR

- Architected an agentic AI pipeline using Gemini 2.5 Flash with Google Search Grounding for Wikipedia Content Gap Analysis, reducing research turnaround from days to minutes
- Built a Python automation system orchestrating 500+ daily evaluation queries across 4 LLM platforms (GPT-4, Gemini, Claude, Perplexity), eliminating 100% of manual data collection
- Improved LLM evaluation throughput by 90%+, cutting data collection time from 1–2 days to under 10 minutes and saving 10+ analyst hours/week
- Developed AutoRater, an ML classification system scoring 1,000+ LLM responses daily with 85% F1 score, improving inter-rater reliability by 40% across evaluation teams
- Deployed automation pipeline across 5+ QA workflows processing 15,000+ monthly evaluations, reducing operational costs by 60%

PROJECTS

Agentic Wiki Content Gap Analyzer · Python · Gemini 2.5 Flash · Google Search Grounding · LangGraph

- Designed a multi-step agentic system with tool-use and search grounding to autonomously identify factual gaps in Wikipedia articles and generate structured improvement reports

Vulnerable-Bookshelf-AI — LLM Security Research Platform · Python · Flask · React · RAG · FAISS · Docker

- Full-stack LLM security testing platform demonstrating 8+ attack vectors (prompt injection, jailbreaks, RAG poisoning); FAISS semantic search over 500+ docs with 95% retrieval accuracy, containerized via Docker

AI-Driven Phishing Simulation Framework · Python · LLMs · Zoho Mail API · Intent Classification

- LLM-powered multi-stage phishing simulation using intent classification and stateful conversational flows; 80% user engagement across 100+ automated campaigns for enterprise security awareness training

OPC UA → IEC 60870-5-104 BESS Gateway Simulator · Python · SCADA · Industrial Protocols

- Protocol translation gateway for Battery Energy Storage Systems; validated 500+ data points on Kalkitech SYNC 3000 hardware with 99.9% message delivery reliability in industrial deployment

SKILLS

AI & LLM Systems: LLM Evaluation, Prompt Engineering, RAG, Agentic Pipelines, Vector Databases (FAISS), Multi-model Orchestration, LangGraph, Hugging Face, PyTorch (fundamentals)

Backend & APIs: Python, Flask, Express.js, REST APIs, GraphQL, WebSockets, Microservices

Data & ML: SQL, Pandas, Scikit-learn, ML Classification, Structured Output Parsing, LLM-generated SQL Analysis

Cloud & DevOps: Docker, AWS, Azure, GCP, Git, GitHub

Other: Java, JavaScript, Node.js, Security Automation, Phishing Simulation

EDUCATION

B.Tech in Information Technology (CGPA: 8.13) | Vellore Institute of Technology

Oct 2020 – Aug 2024 · Vellore, TN

Specialization: Artificial Intelligence, Machine Learning & Data Science

PUBLICATION

Deep Learning-Based Enhanced Object Detection for Humanoid Robots — IEEE Conference Publication

- Proposed a deep learning object detection approach optimized for humanoid robot perception, achieving 90%+ accuracy in real-time environments; Published on IEEE Xplore · DOI: 10.1109/SETCOM64758.2025.10932364
